

Robotics club at the Tunis Science City's Tataouine Branch

Dedicated to youngsters aged between 12 and 15 years old

The club will be launched on March 2023

Within the framework of developing the scientific and technological programme of activities in the Tataouine's Branch of the Tunis Science City, a new robotics club will be launched on March 2023. It aims at encouraging youngsters to be more interested in technology, through their participation in interactive and funny activities and while using simple tools, such as MINDSTORMS EV3, and assembling different robots. It also has as main objective the stimulation of their sense of creativity and innovation, especially in the robotics field, as it represents one of the most important future disciplines.

Schedule of the club: every Saturday, from 3.00 pm to 5.00 pm with an average of 4 sessions per month.

Registration fees: 30 TD per month.
